

Dr Alexander's Hair Loss Clinic,

I am writing this letter to humbly express my sincere gratitude for the medical "miracle" and care I received from Dr Kevin Alexander and his wonderful staff.

In January 2019 I started noticing some hair loss but put it down to seasonal change or perhaps a bit of stress. In March 2019 I started realizing that something was drastically wrong and in May 2019 I was basically bald with just a few patches of long hair left on my head.

My long hair has always been very much part of my identity and at this stage I struggled to put my head out of the door and had to wear a wig. My husband and young daughters were supportive but also very worried and life as I knew it for 43 years ceased to exist as I looked like a proverbial "bald zombie."

I looked everywhere for answers and remedies to cure the baldness. I was sent from pillar to post with no evident answers or explanation making any sense.

Fortunately my hairdresser friend insisted that I make an appointment at [Dr Alexander's Hair Loss Clinic](#). On the 16th of May 2019, Dr Alexander diagnosed me with Alopecia Areata and placed me on immediate treatment for a duration of 3 months.

It is four and a half months later and my confidence is restored. Looking into a mirror I now see a full head of thick, short hair. I am forever grateful to Dr Kevin Alexander and his staff for giving me back my sanity and my life. This might sound extremely vain to someone who has not experienced the shock and devastation caused by losing one's full head of long hair in a matter of 4 short months but it was one of the most traumatic times of my life.

Good hair days make me feel like I can rule the world!!!

Please keep up your phenomenal Clinic, concern and care Dr Alexander. Without you the devastating impact of my severe hair loss would have destroyed my world.

Kind regards

Ms. Z
